

Honey

ROOM 1

ROOM 2

This week each family will be given a kilogram container of Kuratau Honey.

We need to thank our "busy bees" for their hard work they managed to produce 93 kgs of honey this season. The honey produced this year is a bush blend hence the darker colour and slightly tart taste. This honey has been tut tasted. We hope you enjoy our Kuratau Honey. The bee hive has also been a good teaching resource. In term one all classes looked at insects with special focus on bees. A group visited the Honey House and reported back to the school with a slide show and wall display. Thanks must also go to Joe Steel who provided the bees extracted the honey and packed it for us. Thank you also to Craig McGregor who provided the hive. We would appreciate it if you could return the container when you've finished your honey, so that we can fill it up next year.

WHANAU LEARNING – SPACE

The last 2 weeks our tamariki have been participating in their whanau groups rotation learning environment. This was designed as an induction to our school wide topic of SPACE. All groups have had 1 session in the following Space subjects, planets, Maori art, rockets, flight, gravity and astronauts. The activities were hands on and some use experiments to reinforce science concepts. All tamariki seemed to enjoy themselves and had a great time.

Here are some pictures of our kids in action 😊
